Phase 10 hand test

Offline tills: billing with the Wi-Fi switched off, returns, sync, what to check afterwards, and revoking a till. 9 scenarios, about 25 minutes, on the computer that will be the till. Do them in order.

How to use this

Tick Passed when the screen shows exactly what is written. If anything is different, tick Different, write what you saw, and take a screenshot. Send me the scenario numbers and screenshots and I will fix them.

Offline billing only works in the finished (production) version of the app, so this test starts the app differently from **npm run dev**. It uses the test items from the Phase 8 hand test (Test Shirt ₹799, SKU TEST-799).

Setup (once)

S. Start the finished app

DO

1 If **npm run dev** is running, stop it (Ctrl+C in its terminal).
2 In the terminal type **npm run start:offline-check** and press Enter. It builds the app first (1-3 minutes). Wait for "Ready".
3 Open **http://localhost:3000** in Chrome and log in as the owner.

YOU SHOULD SEE

- The app opens as usual.
- The menu has a new link: **Tills**.

When you are finished with this test, stop it with Ctrl+C and go back to npm run dev.

☐ Passed ☐ Different (write what you saw): _____

A. Make this computer a till

1. Register this computer

DO

1 Click **Tills**. Till name **Counter 1**, Branch: your main branch, Bill prefix **T1**. Click "Register this computer".
2 Click **New bill** in the menu.

YOU SHOULD SEE

- "This computer is now the till Counter 1 (T1)..."
- Under Registered tills: Counter 1 (T1), last seen just now.
- On New bill, a strip at the top: "Counter 1 (T1) · Online · 0 waiting to sync".

☐ Passed ☐ Different (write what you saw): _____

B. Billing with no internet

2. Switch the Wi-Fi off and sell a shirt

DO

1 Switch the computer's Wi-Fi off (Wi-Fi icon at the top right of the screen).
2 On New bill press Cmd+R to reload the page.
3 Type TEST-799 in the scan box and press Enter. Cash received **1000**. Click "Save bill offline (F9)".

YOU SHOULD SEE

- After the reload the page still opens; the strip says **Offline billing**.
- A receipt with a **PENDING SYNC** mark, "Tax invoice T1/26-27/00001", total ₹799.00, Change ₹201.00.
- After "Next bill": the strip says "1 waiting to sync".

If the strip does not say Offline billing after switching Wi-Fi off, click the "Bill offline" button on the strip.

☐ Passed ☐ Different (write what you saw): _____

3. Take the shirt back (still offline)

DO

1 Click the **Return (this till's bills)** tab. Click the bill T1/26-27/00001.
2 Return quantity **1**. Money back by Cash. Reason: Testing offline return. Click "Save return offline".

YOU SHOULD SEE

- "Credit note T1R/26-27/00001", Refund ₹799.00 by cash, PENDING SYNC.
- Strip: "2 waiting to sync".

☐ Passed ☐ Different (write what you saw): _____

4. Logging out warns about unsent bills

DO

1 Click **Log out** (top right).

YOU SHOULD SEE

- A warning: "2 bill(s) or return(s) on this till are not sent yet…"
- Click **Stay logged in** (do not log out).

☐ Passed ☐ Different (write what you saw): _____

C. The internet comes back

5. Switch the Wi-Fi on

DO

1 Switch the Wi-Fi on. Wait about 10 seconds on New bill.
2 Click **Bills** in the menu.
3 Click **Sync status** on the New bill strip.

YOU SHOULD SEE

- The strip goes to "0 waiting to sync", "Everything is sent."
- Bills: **T1/26-27/00001** is there, ₹799.00 (and its return).
- Sync status: Waiting to sync 0, Failed 0; under Recently sent: the bill and the return.

☐ Passed ☐ Different (write what you saw): _____

6. Stock is right

DO

1 Click **Stock**.

YOU SHOULD SEE

- Test Shirt · M is the same as before scenario 2 (one sold, one back).

☐ Passed ☐ Different (write what you saw): _____

D. A bill that no longer fits

7. Sell more than is in stock, offline

DO

1 Note how many Test Jacket · L are in stock (Stock page). Call it N.
2 Wi-Fi off. New bill: type TEST-1299, Enter, change Quantity to N + 1 (one more than in stock). Cash received: the total shown. Save bill offline.
3 Wi-Fi on. Wait 10 seconds. Click **Tills**, then **Offline bills to check**.
4 Type "Counted the shelf" in the box and click **Reviewed**.

YOU SHOULD SEE

- The bill was saved offline (PENDING SYNC) and then sent.
- Offline bills to check: the bill, Counter 1, "Stock went below zero: Test Jacket…".
- After Reviewed it moves under "Reviewed" with your note. Stock shows Test Jacket at −1.

Correct the jacket stock afterwards with Stock → Adjust (in, Found, 1) so later tests start from 0.

☐ Passed ☐ Different (write what you saw): _____

E. A lost till

8. Revoke the till

DO

1 Tills → next to Counter 1 click **Revoke**.
2 Click **New bill**, then "Sync status" on the strip, then **Sync now**.
3 Click **Remove this till's data**.

YOU SHOULD SEE

- Tills: Counter 1 shows "revoked".
- Sync status: "This till was revoked by a manager." and "Nothing is waiting to be sent."
- "This computer's till data was removed. It is no longer a till." New bill now says the computer is not a registered till.

In a real shop, if something was not sent, "Save unsent items as a file" appears first; give that file to the owner.

☐ Passed ☐ Different (write what you saw): _____

Final check

F. Register again for real use (optional)

DO

1 Tills → register this computer again with a NEW prefix (e.g. **T2**; T1 can never be used again).

YOU SHOULD SEE

- "This computer is now the till … (T2)".

Stop the app with Ctrl+C when finished, and start npm run dev again for normal work.
