Phase 8 hand test

Returns, credit notes, exchanges, customer payments, returns to suppliers and expenses. 20 scenarios, about 45 minutes. Do them in order: later scenarios use what earlier ones created, and the numbers below assume that.

How to use this

Tick Passed when the screen shows exactly what is written. If anything is different, tick Different, write what you saw, and take a screenshot. Send me the scenario numbers and screenshots and I will fix them.

All amounts assume the two test items from the setup below (₹799 and ₹1,299, TEST 5% GST, prices include GST). Bill and credit note numbers depend on what you made before, so only check that they go up by one.

Setup (once)

S. Start the app and make two test items

DO

1 In the terminal type **npm run dev** and press Enter. Wait for "Ready". Open http://localhost:3000 and log in as the owner.
2 Products → New product. Product name **Test Shirt**, Unit "Piece (pcs)", Tax rate "TEST 5%". Variant 1: SKU **TEST-799**, Size M, Selling price 799. Save product.
3 Products → New product again: **Test Jacket**, same unit and tax rate, SKU **TEST-1299**, Size L, Selling price 1299. Save product.
4 Stock → Opening stock. Line 1: SKU TEST-799, Quantity 30, Cost 400. Click "Add a line". Line 2: SKU TEST-1299, Quantity 10, Cost 700. Save opening stock.

YOU SHOULD SEE

- "Opening stock saved (2 lines)."
- Stock page: Test Shirt · M = **30**, Test Jacket · L = **10**.

Business settings must say "Registered (regular)" with your GSTIN (done in Phase 7). Otherwise bills will say "Bill of Supply".

☐ Passed ☐ Different (write what you saw): _____

A. Returns and credit notes

1. Sell 2 shirts, return 1 for cash

DO

1 New bill. Type TEST-799 in the scan box, press Enter. Change Quantity to 2. Cash received 1598. Save bill (F9).
